## Status Update

See workshare list.

See workshare list.

WVDEP will provide EPA a copy of the SIR when it is received. EPA will unarchive the site, perform a desktop SRA, then open a SI action.

See workshare list.

See workshare list.

This is a Removal-only site. The site will be archived and removed from this list based on the polrep provided by WVDEP.

WVDEP will set up a conference call to encourage the property owner to join the VRP. EPA Site Assessment will invite Removal.

The site was closed under the LCAP in 2009. WVDEP will obtain site boundaries and contaminants addressed under the LCAP. These will be compared to the issues identified in the executive summary and a determination will be made about whether the LCAP cleanup is sufficient for CERCLA.
